

STUDY ABROAD YEAR IN REVIEW 2020

International Academic Programs (IAP), a unit of the [International Division](#), leads campus efforts to provide credit-bearing academic experiences worldwide for UW-Madison students from diverse backgrounds in all majors and academic levels. IAP works in close partnership with study abroad offices within the College of Agricultural and Life Sciences, the College of Engineering, and Wisconsin School of Business to offer programs specifically designed for their students. IAP also collaborates with the [International Internship Program](#) (IIP) to support students participating on credit-bearing internships worldwide.

As with so many aspects of life and society, the field of study abroad felt an unprecedented impact from the COVID-19 global pandemic in 2020. With the health and safety of our students being the top priority, our work in the spring focused on the emergence of COVID-19 and its effect on our students and programs. Throughout the crisis, we worked with UW-Madison offices, partners abroad, and our students and their families to implement recommendations to ensure the safety of our students. This culminated in the cancellation of all programs globally—starting with China, South Korea and Italy in January and February and then all remaining programs worldwide by March 11. We continued to work with our students to achieve their safe return and coordinate the continuation of coursework, through virtual means. With the pandemic and travel restrictions ongoing, subsequent durations were cancelled in advance of their start dates (Summer 2020 programs in March, Fall/Year programs in June and Winter Intersession/Spring/Spring Break 2021 programs in September) to allow students time to develop alternate plans. Though travel restrictions remain in place, we have established protocols to determine what mitigations need to be in place and when on-site programming can safely return.

As containing the pandemic and recovering will require collaboration between countries across the world, the importance of global and cross-cultural engagement and understanding is more critical than ever. We remain dedicated to our [mission](#) and [strategic goals](#) as we explore sustainable program models (international, domestic, and [virtual](#)) that foster students' personal, academic, and professional growth during these unpredictable times.

In our current environment, we have actively developed online content to continue to engage students in global issues and prepare them for study abroad in the future, including developing a [Study Abroad 101 video series](#), creating an [Intro to Study Abroad Canvas](#) course, offering [virtual advising](#), improving our website content and navigation, and leading virtual information sessions throughout the Fall 2020 semester.

Our national ranking this year increased to 15th in the nation, up from 18th last year, in total number of students abroad. Though the rankings are based on participation prior to the pandemic, they do demonstrate the growing engagement of our students in these critical learning experiences, which have increased 12% over the last two years alone. We are grateful for our partners across campus continuing to plan and advise students as we strive to innovate and adapt to a “new normal” when travel safely reopens, and move forward in our mission to support UW-Madison and our students.

NATIONAL RANKINGS AND OPEN DOORS DATA

UW-Madison is ranked 15th among all U.S. universities and colleges for total students studying abroad.

Semester-long program participation:

2nd among U.S. public and Big 10 Academic Alliance Institutions

4th among all U.S. Institutions

Year-long program participation:

1st among Big 10 Academic Alliance Institutions

54% of UW-Madison study abroad students participated on semester and year-long programs, 21 points above the national average and highest among Big 10 Academic Alliance Institutions.

UW-Madison participation breakdown by country is similar to national trends, with the exceptions of Denmark, Ecuador, and Thailand being top 10 UW-Madison destinations which did not make the national top 10 list.

The gender balance for studying abroad at UW-Madison (34% Male: 66% Female) is similar to nation-wide trends (33% Male: 67% female)

UW-Madison study abroad participation increased 5.68% over the previous year, compared with a nation-wide increase of 1.56%.

UW-Madison was ranked 21st overall, 3rd among public institutions, and 3rd among Big 10 Academic Alliance Institutions in the US News & World Report Rankings of "[Schools with Stellar Examples of Study Abroad Programs.](#)"

UW-Madison was 5th among public institutions and the only Big 10 Academic Alliance Institution in the US News & World Report Ranking of the top 100 schools with the "[Most students studying abroad.](#)"

The above rankings are from the [2020 Open Doors® Data Report](#), which includes all UW-Madison U.S. Citizen/Permanent Resident degree-seeking student credit-bearing activity outside of the U.S. for Academic Year 2018-19 (prior to COVID-19 related cancellations), totaling 2,547 students. [Previous UW-Madison Campus-Wide Open Doors.](#)

PARTICIPATION OVERVIEW 2019-20*

2020 participation totals (which includes Fall 2019 through Summer 2020) of 1,515, were 17% less than the previous year, due to the cancellation of on-site programming midway through Spring semester 2020. Prior to the cancellations, participation was on target to surpass 2019 numbers.

The impact of COVID-19 related cancellations on 2019-20 participation statistics are reflected in the following ways:

- Spring semester students includes students who started programs on-site before programs were cancelled and were able to receive credit (mainly continued virtually).
- Spring semester students who did not receive credit (whose programs were cancelled either before or soon after they started) are not included. (These students account for less than 5% of the total number of students who planned to study abroad for Spring semester).
- Academic Year (AY) students who were able to receive credit for Fall semester and Spring semester remain counted as year-long students. AY students who received credit for Fall semester but not for Spring semester are counted as Fall students. Calendar Year (CY) students who received credit for Spring semester only are counted as Spring students.
- All summer students participated virtually (no in-person components).
- For region, students marked as “virtual” only includes students whose programs had no in-person components. Programs that started on-site and converted to virtual after the on-site portion was cancelled are counted towards their on-site location.

27%
of UW-Madison
undergraduates
graduated in 2019-20 with a
study abroad experience

Travel restrictions will continue to impact participation next year as we continue to explore new virtual opportunities that complement on-campus offerings and highlight cross-cultural and global engagement. A small number of [programs](#) were offered virtually during Summer and Fall 2020, including [Wisconsin in Washington](#) and [UW Circle of Care for Global Health and Human Rights Virtual Program](#).

Additional domestic opportunities are being developed, which may face fewer travel restrictions than international programs as well as provide an opportunity to focus on critical issues such as domestic diversity and social justice. [Global Gateway](#) will be adding a domestic option in Washington, DC focusing on race and politics. [Launch Programs](#) will also continue to be developed, international and domestic, to both attract students to UW-Madison and provide students with critical intensive experiential academic opportunities to help prepare them for the transition to college.

All of our programming remains consistent with our core mission of supporting students’ personal, professional, and academic development. We now have Major Advising Pages ([MAPs](#)) representing the majors of almost 75% of the undergraduate student population. MAPs not only reflect our strong collaboration/ties with academic units and advisors, but they also serve as a valuable resource for students to identify the programs that best fit their academic needs and goals.

**based on participation on programs administered through IAP, and through IAPs partnership with the College of Agricultural & Life Sciences (since AY 2015-16), and with the College of Engineering and the Wisconsin School of Business (since Summer 2019). Also includes students on credit-bearing internships through IIP.*

III. CAMPUS-WIDE UNDERGRADUATE PARTICIPATION BY MAJOR

From the APIR Wisconsin Experience Reports: Total number of undergraduate degree recipients by major in 2019-20, by declared major at time of graduation, and the number and percentage of those graduates by major that studied abroad at any point during their academic career.

Departments with a study Abroad Major Advising Page (MAP) are marked with an asterisk.* More information about MAPs can be found [here](#).

The average study abroad participation rate for the entire class of graduates in 2019-20 was 27%, while the average participation rate of majors with MAPs was 33%. IAP continues to increase the number of majors with MAPs each year: 73% of graduates major in departments that have created MAPs, up from 45% the previous year.

The percentages by School and College are: ALS 23%, BUS 44%, EDU 23%, EGR 21%, HEC 36%, L&S 26%, NUR 20%, PHM 26%.

VI. 10-YEAR PARTICIPATION TRENDS

Student participation is not equally distributed across durations in a single year, and as a result participation statistics in 2019-20 do not necessarily follow previous trends due to the COVID-19 Pandemic-related cancellations (Spring Semester 2020 through Summer 2020).

* A resident is defined as a student from Wisconsin (WI) as well as Minnesota (MN) equivalent students.

**Campus data were gathered from the enrollment reports compiled by the Office of the Registrar at the University of Wisconsin. The numbers represent student totals from the fall semester for each academic year. For example, the Res. on Campus figure for Year 2009 represents the total number of residents who were enrolled at the University of Wisconsin in the fall of 2008.

3. IAP and Campus International Student Summary

International students are included as Non-Residents in Table 3. Table 4 provides a look at the participation by International Students on IAP programs as well as their representation on campus at the University of Wisconsin.

Year	International IAP Students	International Students On Campus	Percent of IAP Total	Percent of Campus Total

2020	0(0.00%)	19(1.28%)	402(27.16%)	989(66.82%)	1410(95.27%)	70(4.73%)	1480

*For the years ranging from 2009 to 2014 there were some Academic Level data missing for various study abroad participants. As a result, for these years, there are some discrepancies between the Grand Total number of participants and the sum of Undergrad Participant and Grad Participant totals. The above table reflects re-calculations of previous years' reported data sets. The numbers reflect data as reported in the Student Information System (SIS).

5. IAP Participation by Gender

Year	Male		Female	
	IAP Total	Campus Total	IAP Total	Campus Total
2011	382(28.00%)	20690(48.57%)	961(72.00%)	21905(51.43%)
2012	379(29.52%)	20653(48.66%)	905(70.48%)	21788(51.34%)
2013	391(28.96%)	20894(48.79%)	959(71.04%)	21926(51.21%)
2014	423(28.68%)	21259(49.13%)	1052(71.32%)	22016(50.87%)
2015	353(26.48%)	21306(49.33%)	980(73.52%)	21887(50.67%)
2016	480(31.81%)	21432(49.40%)	1029(68.19%)	21957(50.60%)
2017	436(27.10%)	21320(49.20%)	1173(72.90%)	22016(50.80%)

* Beginning in 2011-2012, worldwide programs (International Internship Program, Dissertation Research, etc.) with one location have been classified by country. Programs with multiple country destinations though with one world region have been counted in the appropriate world region category. For example, UW Chinese Diaspora has been counted as an Asia program, as the multiple country destinations are all in the same world region.

**IAP first offered virtual study abroad programs in summer 2020.

10. 10-year IAP Participation by School/College

School/College	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020
